

Quality Policy

Who we are?

JAVNAS is an engineering partner with over a decade of specialized experience across offshore and onshore projects in the Oil & Gas industry. Our multidisciplinary team brings proven expertise in Piping and Structural Design, Engineering Calculations, Stress Analysis, Dimensional Control Surveys, and 3D Scanning.

Scope of the QMS

Piping Design, Structural Design, Engineering Calculations, Stress Analysis, Dimensional Control Surveys and 3D Scanning, delivered to clients in the Oil & Gas industry from our principal place of operations.

Our quality commitments

Client focus	We deliver technically accurate, code-compliant work that meets or exceeds client requirements. We respond promptly to client feedback and resolve nonconformances without delay.
Technical excellence	We apply recognised international standards (ISO, ASME, API, EN) and maintain the competence of our team through ongoing training and professional development.
Continuous improvement	We monitor our performance through defined quality objectives, internal audits and management review. We use findings to improve our processes and prevent recurrence of issues.
Compliance	We comply with applicable legal, regulatory and contractual requirements. We monitor changes to standards and regulations that affect our services and respond accordingly, including obligations relating to climate change.
People & culture	We provide a safe, respectful working environment. We define clear roles and responsibilities and ensure every team member understands their contribution to quality.
Integrity & confidentiality	We treat all client and project information with strict confidentiality and conduct our business with honesty and professional integrity.
